MEMORANDUM FOR: Colonel White

1. The attached memorandum from the Acting Personnel Director on proposed legislation on Civil Service retirement indicates that the principal changes contemplated in the Bills are liberalized provisions for annuity benefits and for retirement at an earlier age. Detailed comparison of the Bills in chart form, which I recommend you review, is attached. The only recommendations in the memorandum are:

- a. That these liberalized provisions are beneficial.
- b. That the Agency might press for adoption of an amendment, providing for retirement at age 50 after 20 years service in hazardous security work.
- c. That, because of the present study now being undertaken by the Kaplan Committee, no significant action will be taken within the next year on the attached proposals.

2. Recommend that the attached report be forwarded to General Counsel for their information.
